Effective in killing

- unicellular (planktonic)
- multicellular (biofilm)
- and particularly at killing older, thicker biofilms (3-d-old) of *S. mutans* caries pathogens*

Results demonstrate greater effectiveness than chlorhexidine

Percentage cell survival*

Killing of biofilm cells (\pm SD)*

Biofilm	Chlorhexidine	blue [®] m
6 hours old	10.13 (\pm 11.70) %	97.80 (\pm 0.59) %
1 day old	38.53 (\pm 33.37) %	99.94 (\pm 0.07) %
3 days old	20.53 (\pm 21.29) %	99.96 (\pm 0.04) %

blue[®]m

* Data on file upon request only

In vitro evaluation of antimicrobial activity of blue[®]m mouthwash: a pilot study.
Aim: to evaluate the antibiofilm and antimicrobial effects of blue[®]m mouthwash against the caries pathogen *Streptococcus mutans*.
Date: January 24, 2018

FOR PROFESSIONAL USE ONLY

blue[®]m

oxygen for health

toothpaste

fluoride free

bacterial control for dental hygiene and implant care....

Instructions for use

Warnings and precautions: Brush teeth and implants thoroughly with blue[®]m toothpaste at least twice a day for a minimum of 2 minutes at a time or as recommended by your oral health professional. Replace cap properly after use. Do not swallow toothpaste. Not recommended for children under 12 years of age. Do not use if allergic to toothpaste ingredients. If irritation (such as redness, swelling, soreness) of the gums or the mouth occurs, discontinue use and consult an oral health professional. Consult your oral health professional before prolonged use of this product. Avoid contact with the eye.

- special formulation creates active oxygen when in contact with bacteria in the mouth
- normalizes and helps control harmful bacteria
- ensure teeth and gums stay healthy
- fluoride free
- powerful breath care
