

NEW

TF-S

- **Micro Thin** - For uninterrupted passage through tunnel
- **75° E/W angulation** - Perfect for all areas and applications
- **Pressure limiting spring steel construction** - Maximal closure and locking will not damage graft
- **Diamond dusted** - For slip resistance

1 - Create tunnel in any standard manner

2 - Close forceps and walk through tunnel

3 - Grasp connective tissue graft

4 - Withdraw graft through tunnel
